

How can I help support this Makerspace movement at Lanier Middle School?

We are looking for members of the Lanier community to consider donating items which are typically considered trash or junk. Think of the saying, “one man’s trash is another man’s treasure”. In this case, that so called “trash” could very well be the materials needed for a great innovation project.

Before donating, please make sure items are clean and in a safe condition for students to handle when sorting. Keep in mind that students in Science classes will be sorting through the donated materials to fulfill required service hours as part of their middle school experience.

The following recyclable Items could be donated for future projects that could be completed in our NEW Makerspace/Innovation Lab:

Balsa Wood Assorted

Bendable toys

Bottle caps

Buttons

Canisters

Cardboard

Cardboard milk containers

CD's or DVD's

Mesh

Metal or plastic coffee cans

Motorized toys

Packing peanuts

Paint stirring sticks

Paper
